Overview of the Psychology Major

The psychology major at the University of Michigan is designed to provide students with a foundational understanding of psychological principles, theories, and research methods. This program emphasizes both the scientific and applied aspects of psychology, preparing students for a variety of careers or further education in graduate programs. Students will explore various domains of psychology, including cognitive, developmental, social, and clinical psychology, allowing them to develop a well-rounded perspective on human behavior.

One of the unique features of the UMich psychology program is its strong emphasis on research. Students have the opportunity to engage in hands-on research experiences, often collaborating with faculty members on ongoing projects. This exposure not only enriches their learning experience but also enhances their resumes when applying for jobs or

graduate schools.

Admission Requirements

To be considered for the psychology major at UMich, students must meet specific admission criteria. The initial step is typically to gain admission to the University of Michigan as a whole. Once admitted, students will declare their intention to major in psychology, usually during their freshman or sophomore year.

General Admission Criteria

The general admission requirements to UMich include:

- Completion of high school education with a strong academic record.
- Standardized test scores (SAT or ACT) if applicable.
- Letters of recommendation, particularly from teachers in relevant subjects.
- A compelling personal statement or essay that outlines the student's interest in psychology.

It's important for prospective students to be aware that admission to the University of Michigan can be highly competitive, with a holistic review process that considers various aspects of a student's application.

Course Requirements

Once admitted to the psychology program, students must complete a series of required courses to fulfill their major requirements. These courses are designed to provide a comprehensive foundation in psychology.

Core Courses

The core courses typically include:

- Introduction to Psychology
- Research Methods in Psychology
- Statistical Methods in Psychology
- Developmental Psychology
- Abnormal Psychology

- Cognitive Psychology
- Social Psychology

Each of these courses serves a critical role in developing students' understanding of psychological concepts and research methodologies. In addition to the core courses, students may choose electives that align with their interests, such as courses in health psychology, industrial-organizational psychology, or neuropsychology.

Elective Courses

Elective courses allow students to tailor their education to their specific interests and career goals. Some popular electives in the UMich psychology program include:

- Health Psychology
- Forensic Psychology
