5 star hotel business plan pdf: Rural Tourism Katherine Dashper, 2015-01-12 Rural regions are experiencing fundamental challenges to their ways of life and social fabric, as traditional land-based occupations are in decline and younger and better-educated rural residents migrate to cities for greater work, social and cultural opportunities. Rural tourism offers a possible solution to the problems associated with lost economic opportunities and population decline that accompany the waning of agriculture. Many governments and regional authorities have embraced rural tourism as an opportunity to bring new money into rural regions, stimulating growth, providing employment opportunities and thus beginning to halt rural decline. However, the possibilities of rural tourism to promote rural regeneration have been criticised for being over-stated and unrealistic. Rural tourism has frequently been found to under-deliver in terms of expected economic benefits and job creation, and may sometimes exacerbate local hierarchies and inequalities. This edited collection questions the contribution tourism can and does make to rural regions. Drawing on a range of geographically diverse, research-driven case studies, the book is thematically organised to explore a variety of issues relevant to rural tourism, from the perspectives of local communities, businesses, government/policy makers and the tourists themselves.

5 star hotel business plan pdf: *Tourism, Land Grabs and Displacement* Andreas Neef, 2021-05-09 This book examines the global scope of tourism-related grabbing of land and other natural resources. Tourism is often presented as a peaceful and benevolent sector that brings people from different cultural backgrounds together and contributes to employment, poverty alleviation, and global sustainable development. This book sheds light on the lesser known and much darker side of tourism as it unfolds in the Global South. While there is no doubt that tourism has been an engine of economic growth for many so-called developing countries, this has often come at the cost of widespread dispossession and displacement of Indigenous and non-indigenous communities. In many countries of the Global South, tourism development is increasingly prioritised by governments, businesses, international financial institutions and donors over the legitimate land and resource rights of local people. This book examines the actors, drivers, mechanisms, discourses and impacts of tourism-related land grabbing and displacement, drawing on more than thirty case studies from Latin America and the Caribbean, sub-Saharan Africa, South and Southeast Asia, the Middle East and the Southwest Pacific. The book provides solid grounds for an informed debate on how different actors are responsible for the adverse impacts of tourism on land rights infringements, what forms of resistance have been deployed against tourism-related land grabs and displacement, and how those who have violated local land and resource rights can be held accountable. *Tourism, Land Grabs and Displacement* will be essential reading for students and scholars of land and resource grabbing, tourism studies, development studies and sustainable development more broadly, as well as policymakers and practitioners working in those fields.
