Updated as of May 29, 2018 The FMCSA proposes to establish and maintain a National Registry of Certified Medical Examiners (NRCME) and to require that all medical examiners who conduct medical examinations for interstate commercial motor vehicle drivers complete certain training concerning FMCSA physical qualification standards, pass a test to verify an understanding of those standards, and maintain competence by periodic training and testing. Following establishment of the NRCME and a transition period, FMCSA would accept as valid only medical examiners' certificates issued by medical examiners listed on the NRCME. The FMCSA is developing the NRCME program to improve highway safety and driver health by requiring that medical examiners be trained and certified to determine effectively whether a commercial motor vehicle driver's health meets FMCSA standards. The program implements requirements in 49 U.S.C. 31149 and supports FMCSA's goal to improve safety and reduce fatalities on our Nation's highways. nrcme study guide pdf: The Industrial Revolution William J. Ashworth, 2017-01-26 The British Industrial Revolution has long been seen as the spark for modern, global industrialization and sustained economic growth. Indeed the origins of economic history, as a discipline, lie in 19th-century European and North American attempts to understand the foundation of this process. In this book, William J. Ashworth questions some of the orthodoxies concerning the history of the industrial revolution and offers a deep and detailed reassessment of the subject that focuses on the State and its role in the development of key British manufactures. In particular, he explores the role of State regulation and protectionism in nurturing Britain's negligible early manufacturing base. Taking a long view, from the mid 17th century through to the 19th century, the analysis weaves together a vast range of factors to provide one of the fullest analyses of the industrial revolution, and one that places it firmly within a global context, showing that the Industrial Revolution was merely a short moment within a much larger and longer global trajectory. This book is an important intervention in the debates surrounding modern industrial history will be essential reading for anyone interested in global and comparative economic history and the history of globalization.

nrcme study guide pdf: Significant New Use - Rules on Certain Chemical Substances (Us Environmental Protection Agency Regulation) (Epa) (2018 Edition) Law Library, 2018-09 Significant New Use - Rules on Certain Chemical Substances (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) The Law Library presents the complete text of the Significant New Use - Rules on Certain Chemical Substances (US Environmental Protection Agency Regulation) (EPA) (2018 Edition). Updated as of May 29, 2018 EPA is promulgating significant new use rules (SNURs) under the Toxic Substances Control Act (TSCA) for 57 chemical substances which were the subject of premanufacture notices (PMNs). The applicable review periods for the PMNs submitted for these 57 chemical substances all ended prior to June 22, 2016 (i.e., the date on which President Obama signed into law the Frank R. Lautenberg Chemical Safety for the 21st Century Act which amends TSCA). Thirty-four of these chemical substances are subject to TSCA section 5(e) consent orders issued by EPA. This action requires persons who intend to manufacture (defined by statute to include import) or process any of these 57 chemical substances for an activity that is designated as a significant new use by this rule to notify EPA at least 90 days before commencing that activity. The required notification initiates EPA's evaluation of the intended use within the applicable review period. Manufacture and processing for the significant new use is unable to commence until EPA has conducted a review of the notice, made an appropriate determination on the notice, and take such actions as are required with that determination. This book contains: - The complete text of the Significant New Use - Rules on Certain Chemical Substances (US Environmental Protection Agency Regulation) (EPA) (2018 Edition) - A table of contents with the page number of each section
