passport to magonia pdf: Passport to Magonia Jacques Vallee, 2014-11-23 Jacques Vallee, a mathematician and astronomer, discusses and explores many of the most interesting reports of UFO sightings from 1868-1968.

passport to magonia pdf: *Passport to Magonia* Jacques Vallee, 1993 Over two decades ago, eminent scientist Vallee wrote a provocative book about alleged UFO landings, folklore, and certain unexplained phenomena. That long-out-of-print book--which discussed the most interesting reports of more than 1,000 apparently reliable witnesses--has become an underground classic and is now being reissued.

passport to magonia pdf: *Wonders in the Sky* Jacques Vallee, Chris Aubeck, 2010-10-28 One of the most ambitious works of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of *Wonders in the Sky* reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features- such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In *Wonders in the Sky*, respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, *Wonders in the Sky* is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

passport to magonia pdf: *Intimate Alien* David J. Halperin, 2020-03-24 A voyage of exploration to the outer reaches of our inner lives. UFOs are a myth, says David J. Halperin—but myths are real. The power and fascination of the UFO has nothing to do with space travel or life on other planets. It's about us, our longings and terrors, and especially the greatest terror of all: the end of our existence. This is a book about UFOs that goes beyond believing in them or debunking them and to a fresh understanding of what they tell us about ourselves as individuals, as a culture, and as a species. In the 1960s, Halperin was a teenage UFOlogist, convinced that flying saucers were real and that it was his life's mission to solve their mystery. He would become a professor of religious studies, with traditions of heavenly journeys his specialty. With *Intimate Alien*, he looks back to explore what UFOs once meant to him as a boy growing up in a home haunted by death and what they still mean for millions, believers and deniers alike. From the prehistoric Balkans to the deserts of New Mexico, from the biblical visions of Ezekiel to modern abduction encounters, *Intimate Alien* traces the hidden story of the UFO. It's a human story from beginning to end, no less mysterious and fantastic for its earthliness. A collective cultural dream, UFOs transport us to the outer limits of that most alien yet intimate frontier, our own inner space.

passport to magonia pdf: *Authors of the Impossible* Jeffrey J. Kripal, 2011-09-16 "Outstanding and almost certainly controversial. . . . [Kripal] has promise to revitalize and extend the reach of religious studies." —Choice Most scholars dismiss research into the paranormal as pseudoscience, a frivolous pursuit for the paranoid or gullible. Even historians of religion, whose work naturally attends to events beyond the realm of empirical science, have shown scant interest in the subject. But the history of psychical phenomena, Jeffrey J. Kripal contends, is an untapped source of insight into the sacred and by tracing that history through the last two centuries of Western thought we can

see its potential centrality to the critical study of religion. Kripal grounds his study in the work of four major figures in the history of paranormal research: psychical researcher Frederic Myers; writer and humorist Charles Fort; astronomer, computer scientist, and ufologist Jacques Vallee; and philosopher and sociologist Bertrand Méheust. Through incisive analyses of these thinkers, Kripal ushers the reader into a beguiling world somewhere between fact, fiction, and fraud. The cultural history of telepathy, teleportation, and UFOs; a ghostly love story; the occult dimensions of science fiction; cold war psychic espionage; galactic colonialism; and the intimate relationship between consciousness and culture all come together in *Authors of the Impossible*, a dazzling and profound look at how the paranormal bridges the sacred and the scientific. "An excellent book. . . . engaging, witty, and thoughtful." -- Christopher Partridge, Lancaster University "[Kripal] demands nothing short of a paradigm shift in order to make sense of the odd, the anomalous, and the inexplicable." —Catherine L. Albanese, University of California, Santa Barbara "Quietly earth-shattering." —Victoria Nelson, author of *The Secret Life of Puppets*

passport to magonia pdf: *Flying Saucers* C.G. Jung, 2014-12-18 Written in the late 1950s at the height of popular fascination with UFO's, *Flying Saucers* is the great psychologist's brilliantly prescient meditation on the phenomenon that gripped the world. A self-confessed sceptic in such matters, Jung was nevertheless intrigued, not so much by their reality or unreality, but by their psychic aspect. He saw flying saucers as a modern myth in the making, to be passed down the generations just as we have received such myths from our ancestors. In this wonderful and enlightening book Jung sees UFO's as 'visionary rumours', the centre of a quasi-religious cult and carriers of our technological and salvationist fantasies. 40 years later, with entire religions based on the writings of science fiction authors, it is remarkable to see just how right he has proved to be.

passport to magonia pdf: *Forbidden Science* Jacques Vallee, 1992 Known principally as an investigator of the UFO phenomenon and a science fiction novelist, the French-born Vallee (now a resident of the U.S.) has also worked as a computer scientist in both academia and industry. UFOlogists will not find the answers to all of their questions here, for although Vallee believes that UFOs exist, he has no idea just what they are. Therein lies the excellence of his dazzling diary: it offers a glimpse into the mind of a scientist who seems to challenge every preconception and established piety. To his academic training as a mathematician and scientist, which stressed rational approaches to problems, Vallee has brought an interest in the mystical, the psychical, and the paranormal. He has been a Rosicrucian and has studied the works of ancient scientists like Paracelsus. His diary is replete with profoundly insightful, often devastating observations about the strengths and weaknesses of France and the U.S., their academics and their researchers in industry.

passport to magonia pdf: *The Invisible College* Jacques Vallee, 2015-06-01 What is the nature of unidentified aerial phenomena? Forty years ago a small cadre of dedicated researchers began actively investigating cases, interviewing witnesses, and exchanging data through a small, informal network of international contacts. Today this low profile network, or invisible college, has grown into a larger, multi-nation volunteer research effort joined by many individuals. But the questions first raised 40 years ago remain current and unanswered. I believe that a powerful force has influenced the human race in the past and is again influencing it now. Does this force represent alien intervention, or does it originate entirely within human consciousness? This is the question that forms the basis of the work of the Invisible College of UFO researchers. - Jacques Vallee Dr. Jacques Vallee began his professional life as an astronomer at the Paris Observatory in 1961. While on the staff of the French Space Committee, he witnessed the destruction of the tracking tapes of unknown objects orbiting the earth, initiating a lifelong interest in the UFO phenomenon. Vallee arrived in the U.S. in 1962 and worked in astronomy at the University of Texas at Austin before receiving a Ph.D. in computer science from Northwestern University in 1967. There he became a close associate of J. Allen Hynek, then scientific consultant for the U.S. Air Force on Project Blue Book—the result was *The Invisible College*. Other works by Vallee include *Dimensions*, *Confrontations*, and *Revelations*. Dr. Vallee is presently a venture capitalist living in San Francisco.

passport to magonia pdf: *The Goblin Universe* F. Holiday, 1990-12-15 Are paranormal

events real, or are they only a figment of our imagination? Ted Holiday addresses this issue with some startling revelations. In *The Goblin Universe* is found the world of the mind - the greater universe. This is the place of psychic phenomena, prophecies, ghosts, poltergeists, UFOs, the Men in Black, dragons, Bigfoot, and the Loch Ness Monster. This amazing world is explored through Ted Holiday's personal experiences and his search for a unified theory of the paranormal. As Colin Wilson points out in the introduction, we must use our intuition, as Holiday did, in order to see into the goblin universe - the realm of unexplained illusions. The *Goblin Universe* examines a wide range of fascination occult phenomena, and explores the technologies we may use to expand our native psi abilities. In what sense is this a real world? Ted Holiday spent the greater part of his life investigating such things, and gained valuable first-hand experience of natural phenomena, which enabled him to develop groundbreaking ideas about what they really are. Throughout history, mankind has been confronted by things that just do not fit with conventional notions of reality, yet scientists have completely failed to come to grips with the mass of evidence that has emerged. Here, at last, is a reasoned argument that offers a new way of thinking about phenomena - the foundations of a new science.

In the last portion of the book, he notes the factors that inhibit research into the phenomenon--the triple coverup and political motivations--and concludes that the extraterrestrial theory is simply not strange enough to explain the facts.

passport to magonia pdf: TRINITY Jacques Vallée, Paola Leopizzi Harris, 2021-05-07 Hard evidence has existed since 1945 for the actual recovery of unidentified flying craft in the United States, according to a new research book, *TRINITY: The Best-Kept Secret* written by two seasoned analysts of the global patterns behind the UFO phenomenon. Italian investigative journalist Paola Leopizzi Harris and French-born information scientist Dr. Jacques F. Vallée have teamed up to uncover the details of a New Mexico crash in 1945, fully two years before the well-known incident at Roswell and the famous sighting by pilot Kenneth Arnold in 1947. Over several site investigation surveys Harris and Vallée reconstructed the historic observations by three witnesses, two of whom

are still living, who described to them the circumstances of the crash, with details of the recovery of a nearly-intact flying vehicle and its occupants by an Army detachment. Combining their long experience in field research around the world, the authors have documented the step-by-step efforts by the military to remove the object, an avocado-shaped craft weighting several tons, from the property where it crash-landed during a storm. Surprisingly, the literature of the field only includes a few passing mentions about the case, and only one (foreign) TV documentary has mentioned it, but the correlation between the crash of the extraordinary object and the explosion of the first atom bomb at White Sands, less than 20 miles away, has been missed. Harris and Vallée suggest that the correlation is significant for physical, geographic and biological reasons, quite apart from the obvious strategic implications. The witnesses were able to observe not only the actual crash of the object on their property but every step of the military efforts to lift it and take it away. Fearing retaliation, they remained silent for some 60 years about what they had seen and done over those nine days at the site while the recovery was proceeding. When placed in the context of the history of chemical and physical analysis of retrieved UFO debris--an area where Harris and Vallée have long collaborated--the devices observed by the witnesses raise a number of very important scientific questions. The Honorable Paul Hellyer, former Minister of National Defence of Canada, has stated: Paola Harris and Jacques Vallée have spent much effort doing field research on location (...) It is now time that their discovery be revealed to the world.

passport to magonia pdf: Confrontations Jacques Vallee, 2015-06-01

ASCIENTIFICDETECTIVESTORY In *Confrontations*, the second volume of his Alien Contact Trilogy, Dr. Jacques Vallee personally investigates forty astonishing UFO cases from around the world. He finds it shocking that professional scientists have never seriously examined this material. This book is about the hopes, experiences, and the frustrations of a scientist who has gone into the field to investigate a bizarre, seductive, and often terrifying phenomenon reported by many witnesses as a contact with an alien form of intelligence. Dr. Jacques Vallee was born in France, where he received a Bachelor of Science degree in mathematics from the Sorbonne and a Master of Science in astrophysics from the University of Lille. He began his professional life as an astronomer at the Paris Observatory in 1961. While on the staff of the French Space Committee, he witnessed the destruction of the tracking tapes of unknown objects orbiting the earth, initiating a lifelong interest in the UFO phenomenon. Vallee arrived in the U.S. in 1962, worked in astronomy at the University of Texas at Austin, and wrote two highly respected scientific examinations arguing for the Extraterrestrial Hypothesis (ETH) of UFO origins. In 1967, he received a Ph.D. in computer science from Northwestern University, where he became a close associate of J. Allen Hynek, then scientific consultant for the U.S. Air Force on Project Blue Book. Eventually concluding that the ETH was too narrow to encompass the burgeoning UFO data, he conducted his own extensive global research, resulting in the Alien Contact Trilogy. Dr. Vallee is presently a venture capitalist living in San Francisco. His website is www.jacquesvallee.com.

passport to magonia pdf: The FBI-CIA-UFO Connection Bruce Maccabee, 2014-09-08 This book goes inside the real X-Files. Not only have the FBI and CIA investigated UFOs, but both agencies have actively tried to conceal that fact from the public. This book proves it. These agencies collected information which, when combined with evidence collected by Air Force Intelligence, proves that at least some UFOs are interplanetary craft. Furthermore, top Air Force officials knew this over sixty years ago and withheld (covered up?) this information from the American people. Written by Dr. Bruce Maccabee, one of the most respected voices in UFO research, this is a riveting page-turner, packed with information. It tells the real story of why America's leading intelligence

agencies have been genuinely concerned about UFOs, and why the problem of UFOs is unlikely to go away any time soon.

passport to magonia pdf: Project Beta Greg Bishop, 2005-02-08 The shocking true story of the United States government's quest to hide the reality of extraterrestrial contact, even at the cost of its citizens. In 1978, Paul Bennewitz, an electrical physicist living in Albuquerque, New Mexico, became convinced that the strange lights he saw hovering in the night sky were extraterrestrial. He reached out to newspapers, senators, and even the president before anyone responded. Air Force investigators listened to his story, as did Bill Moore, the author of the first book on the infamous Roswell UFO incident. Unbeknownst to Bennewitz, Moore was hired by a group of intelligence agents to keep tabs on Bennewitz while the Air Force ran a psychological profile and disinformation campaign on the unsuspecting physicist. In return, Air Force Intelligence would let Moore in on classified UFO material. What follows is a scandalous true tale of disinformation, corruption, and exploitation, all at the hands of the United States intelligence community.

passport to magonia pdf: Final Events and the Secret Government Group on Demonic Ufos and the Afterlife Nick Redfern, 2013-08 For decades, stories of alien abductions, UFO encounters, flying saucer sightings, and Area 51 have led millions of people to believe that extraterrestrials are secretly among us. But what if those millions of people are all wrong? What if the UFO phenomenon has much darker and far more ominous origins? For four years, UFO authority Nick Redfern has been investigating the strange and terrifying world of a secret group within the U.S. Government known as the Collins Elite. The group believes that our purported alien visitors are, in reality, deceptive demons and fallen angels. They are the minions of Satan, who are reaping and enslaving our very souls, and paving the way for Armageddon and Judgment Day. In FINAL EVENTS you'll learn about the secret government files on occultists Aleister Crowley and Jack Parsons, and their connections to the UFO mystery; revelations of the demonic link to the famous UFO crash at Roswell, New Mexico, in 1947; the disclosure of government investigations into life-after-death and out-of-body experiences; and an examination of the satanic agenda behind alien abductions. FINAL EVENTS reveals the stark and horrific truths about UFOs that some in the government would rather keep secret.

Vallee reveals just how the scientific community was misled by the government, how the best data on UFOs was kept hidden, and how the public record was shamelessly manipulated.

passport to magonia pdf: The Trickster and the Paranormal George P. Hansen, 2001-08-20 Paranormal and supernatural events have been reported for millennia. They have fostered history's most important cultural transformations (e.g., via the miracles of Moses, Jesus, Mohammed). Paranormal phenomena are frequently portrayed in the world's greatest art and literature, as well as in popular TV shows and movies. Most adults in the U.S. believe in them. Yet they have a marginal place in modern culture. No university departments are devoted to studying psychic phenomena. In fact, a panoply of scientists now aggressively denounces them. These facts present a deeply puzzling situation. But they become coherent after pondering the trickster figure, an archaic being found worldwide in mythology and folklore. The trickster governs paradox and the irrational, but his messages are concealed. This book draws upon theories of the trickster from anthropology, folklore,

sociology, semiotics, and literary criticism. It examines psychic phenomena and UFOs and explains why they are so problematical for science.

passport to magonia pdf: Supernatural Graham Hancock, 2006-09-01 Publisher's Note: A new, expanded edition has replaced this book under the new title Visionary: The Mysterious Origins of Human Consciousness, ISBN 9781637480069 This definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release. Less than fifty thousand years ago mankind had no art, no religion, no sophisticated symbolism, no innovative thinking. Then, in a dramatic and electrifying change, described by scientists as the greatest riddle in human history, all the skills and qualities that we value most highly in ourselves appeared already fully formed, as though bestowed on us by hidden powers. In Supernatural Graham Hancock sets out to investigate this mysterious beforeandafter moment and to discover the truth about the influences that gave birth to the modern human mind. His quest takes him on a detective journey from the stunningly beautiful painted caves of prehistoric France, Spain, and Italy to rock shelters in the mountains of South Africa, where he finds extraordinary Stone Age art. He uncovers clues that lead him to the depths of the Amazon rainforest to drink the powerful hallucinogen Ayahuasca with shamans, whose paintings contain images of supernatural beings identical to the animalhuman hybrids depicted in prehistoric caves. Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings. Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other dimensions. Could the supernaturals first depicted in the painted caves be the ancient teachers of mankind? Could it be that human evolution is not just the meaningless process that Darwin identified, but something more purposive and intelligent that we have barely begun to understand?

passport to magonia pdf: American Cosmic D.W. Pasulka, 2019-01-23 More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. American Cosmic examines the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like The X-Files, which can influence memory, and the believability lent to that media by the search for planets that might support life. American Cosmic explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.

passport to magonia pdf: The Edge of Reality: a Progress Report on Unidentified Flying Objects J. Hynek, Jacques Vallee, 1975-12-15 Two of our country's most eminent scientists, both of whom have studied the UFO phenomenon for decades, have collaborated on this report of what serious scientists now believe about it. And they show that an increasing number of scientists are taking the UFO subject seriously. From the outset, Hynek and Vallee make their position clear: UFOs represent an unknown but real phenomenon. The far-reaching implications take us to the very edge of what we consider the known and real in our physical environment. Perhaps, say the authors, UFOs signal the existence of a domain of nature as yet totally unexplored. In this mind-stretching book, the authors sample UFO reports-including those allegedly involving humanoids-and describe the patterns that have been perceived in the behavior of the phenomenon. They also establish a framework for the further study of the UFO phenomenon. Where might such study lead? What can be studied, and how? What is the real nature of the UFO phenomenon? Does it originate with the actions of other intelligences in the universe? Does the UFO phenomenon have a purely physical

explanation, or is there a vaster, hidden realm that holds the solution? J. Allen Hynek is Professor of Astronomy at Northwestern University. For years, he was astronomical consultant to the U.S. Air Force. Over the years, as Dr. Hynek focused on the UFO reports that appeared unsolvable, he began to believe that there is something most unusual going on. Jacques Vallee is the author of several classic UFO books. After obtaining his doctorate in computer sciences from Northwestern University, he joined the Computer Laboratory at Stanford University.

passport to magonia pdf: UFO Drawings from the National Archives David Clarke, 2018-02-27 Originally set up after a request from Winston Churchill, the Ministry of Defence's UFO Desk ran for over 60 years, collating mysterious sightings and records of strange objects in the sky from observant members of the public. As well as letters and official reports, the UFO files contain photographs, drawings and even paintings of these curious sightings. David Clarke has selected examples from The National Archives to present a history of British UFO art and the remarkable stories behind these images, including an alien craft on the A1, flying saucers over Hampstead, and a spaceship landing at a primary school in Macclesfield.

passport to magonia pdf: Where the Footprints End Timothy Renner, Joshua Cutchin, 2020-05-04 Our forests seem to be hiding something much more complex than an undiscovered gorilla. Bigfoot may be howling from a lonely mountaintop, but the bigfoot phenomenon is whispering secrets... if we will only listen. Eyewitnesses, investigators, and cryptozoologists worldwide contend ample evidence exists supporting the survival of large, hairy, apelike creatures alongside mankind today, lurking in the wilderness. By all appearances, these beings seem wholly natural, interacting with their surroundings and leaving behind hair, blood, droppings, and, of course, footprints. Yet despite their apparently physical nature, bigfoot and its hairy hominid kin consistently appear mired in High Strangeness--the peculiar, ineffable, and nonsensical absurdities so often encountered in paranormal phenomena. Some sightings seem more consistent with mythology than biology. Bigfoot often present supernatural attributes, like luminescent eyes or the ability to pass, ghostlike, through structures. Anomalous lights are regularly seen in areas of frequent sasquatch activity. Footprints persistently, if rarely, display odd numbered toes, and--most bafflingly--bigfoot trackways suddenly terminate in the middle of open, untouched terrain. In Volume 1 of *Where the Footprints End: High Strangeness and the Bigfoot Phenomenon*, authors Joshua Cutchin and Timothy Renner carefully examine not only the intersection of hairy apemen with global folklore--of poltergeists, faeries, extraterrestrials, magic, witches, ghosts, and archetypal women-in-white--but also question the fundamental assumptions underlying contemporary cryptozoological beliefs surrounding bigfoot. Impressively, even exhaustively researched, *Where the Footprints End* should give all students of the anomalous serious pause for thought. By documenting both the high strangeness that surrounds Bigfoot sightings, and the deep folklore in which they are embedded, Cutchin and Renner so far broaden the context of Bigfoot encounters that it is no longer possible to credit any single theory or literalistic interpretation concerning their nature. Indeed, we begin to suspect that the reality of Bigfoot is less a problem to be solved than a mystery to dissolve our view of reality itself. Here at last is the book that dear old Bigfoot deserves.- Patrick Harpur, author of *Daimonic Reality* This book poses a danger to the foundations of cryptozoology. While mainstream Bigfoot investigators would have you believe that people around the world are merely encountering a lost ape, Cutchin and Renner dig into the details they've swept under the rug, excavating countless Bigfoot reports involving glowing orbs, telepathic communication, and paranormal phenomena that have more in common with tales of ancient gods and alien abductions than they do with primatology. Meticulously researched and backed up with a treasure trove of footnotes, *Where the Footprints End* is poised to do for Bigfoot what *Passport to Magonia* did for

Human history is a seemingly endless succession of bloody conflicts and devastating turmoil. Yet, inexplicably, in the light of astonishing intellectual and technological advancement, Man's progress has been halted in one crucial area: he still indulges the primitive beast within and makes war upon his neighbors.
