Frantzen, 1998-11-15 Since the publication of John Boswell's *Christianity, Social Tolerance, and Homosexuality*, historians have accepted the view that the early Middle Ages tolerated and even fostered same-sex relations and that intolerance of homosexuality developed only late in the medieval period. In this extraordinary study, Allen J. Frantzen challenges this long-held belief, showing that the early medieval Church did not tolerate same-sex acts, and, furthermore, that men and women during this time who preferred homosexual relations pursued their desires in spite of official sanctions. The early medieval period was, Frantzen argues, an age before people recognized the existence - or the possibility - of the closet.

pe bible: *Let it Go Among Our People* David Price, Charles Caldwell Ryrie, 2004 The King James translators drew upon all of their English predecessors and much more besides. The authors offer both a political and literary history of the Bible. Their purpose is to explain how styles of presenting Scriptures in English developed out of political and ecclesiastical circumstances. The result is a refreshing reassessment of the literary and scholarly accomplishment of all the Renaissance Bibles and a clear account of what is different and distinctive in the King James Version. They also linger over the texts of the Bible, comparing significant passages in the various versions. Such close study of the texts is warranted because the English Bible has had a profound effect on English language, literature, politics and ideas; it has left a lasting impression on the language that we speak today. No other language, except perhaps German, can boast that its vernacular translation of the Bible is a literary masterpiece in its own right.

PATTWELL, 2024-06-18 Handlist to manuscripts in Trinity College Dublin, covering all 79 Middle English prose manuscripts and indexing more than 539 separate items The manuscripts in Trinity College Dublin are predominantly from the library of Archbishop James Ussher (1581-1656). A well-known bibliophile of the sixteenth century, he was also primate of All Ireland and fellow and professor of Trinity College. Following some movement of the collection, it was eventually returned to Trinity College after the Restoration, at the behest of Charles II. It is a significant collection, both in national and international terms, with over 600 manuscripts, 79 of which contain Middle English prose. Among the manuscripts in the collection are several Wycliffite Bibles, and collections of sermons and tracts, some of them unique copies. The collection also contains writings by Richard Rolle, Walter Hilton and William Flete, and copies of Thomas à Kempis's *Imitation of Christ*, as well as the *Pore Caitif* and *The Cloud of Unknowing*, both of which are anonymous. There are several copies of the *Brut* chronicle, two of which (MSS 489 and 505) are illuminated, translations of Giraldus Cambrensis's *Expugnatio Hibernica*, and a copy of Robert Bale's *Chronicle of London*, 1189-1461. Also of note are the various collections of recipes - medical, culinary and alchemical. Dictionary-style items demonstrate the trilingual nature of the Medieval period, with single words being offered in English alongside Anglo-Norman and/or Latin words, or as marginal glosses. Fifteenth-century instructions for the coronation of a King or Queen, hidden among some later material, as well as other unidentified heraldic pieces, suggest that some of the manuscripts may be associated with the office of the Ulster King of Arms. The current handlist covers 79 manuscripts, and indexes more than 539 separate items, offering a significant contribution to the understanding of the cultural world of the Medieval period.
