ronald mcdonald coloring page: *The Intellectual Property of Nations* Laura R. Ford, 2021-05-20 Drawing on macro-historical sociological theories, this book traces the development of intellectual property as a new type of legal property in the modern nation-state system. In its current form, intellectual property is considered part of an infrastructure of state power that incentivizes innovation, creativity, and scientific development, all engines of economic growth. To show how this infrastructure of power emerged, Laura Ford follows macro-historical social theorists, including Michael Mann and Max Weber, back to antiquity, revealing that legal instruments very similar to modern intellectual property have existed for a long time and have also been deployed for similar purposes. Using comparative and historical evidence, this groundbreaking work reflects on the role of intellectual property in our contemporary political communities and societies; on the close relationship between law and religion; and on the extent to which law's obliging force depends on ancient, written traditions.

Besides its popularity for their fast food, McDonald's has also become well-known for pouring its beverages into hundreds of different glasses, cups, mugs, and other drinkware. ronald mcdonald coloring page: **The Color of Money** Mehrsa Baradaran, 2017-09-14 "Read this book. It explains so much about the moment...Beautiful, heartbreaking work." —Ta-Nehisi Coates "A deep accounting of how America got to a point where a median white family has 13 times more wealth than the median black family." —The Atlantic "Extraordinary...Baradaran focuses on a part of the American story that's often ignored: the way African Americans were locked out of the financial engines that create wealth in America." —Ezra Klein When the Emancipation Proclamation was signed in 1863, the black community owned less than 1 percent of the total wealth in America. More than 150 years later, that number has barely budged. *The Color of Money* seeks to explain the stubborn persistence of this racial wealth gap by focusing on the generators of wealth in the black community: black banks. With the civil rights movement in full swing, President Nixon promoted

"black capitalism," a plan to support black banks and minority-owned businesses. But the catch-22 of black banking is that the very institutions needed to help communities escape the deep poverty caused by discrimination and segregation inevitably became victims of that same poverty. In this timely and eye-opening account, Baradaran challenges the long-standing belief that black communities could ever really hope to accumulate wealth in a segregated economy. "Black capitalism has not improved the economic lives of black people, and Baradaran deftly explains the reasons why." —Los Angeles Review of Books "A must read for anyone interested in closing America's racial wealth gap." —Black Perspectives

ronald mcdonald coloring page: Whiteness of a Different Color Matthew Frye Jacobson, 1999-09-01 America's racial odyssey is the subject of this remarkable work of historical imagination. Matthew Frye Jacobson argues that race resides not in nature but in the contingencies of politics and culture. In ever-changing racial categories we glimpse the competing theories of history and collective destiny by which power has been organized and contested in the United States. Capturing the excitement of the new field of whiteness studies and linking it to traditional historical inquiry, Jacobson shows that in this nation of immigrants race has been at the core of civic assimilation: ethnic minorities, in becoming American, were re-racialized to become Caucasian.
