If you cannot pass the state law exam (MPJE), you can't work as a pharmacist and do all the really cool things that you've wanted to do (including pay off your student loans). MPJE Master: Federal Pharmacy Law Review was intended to simplify the process of learning pharmacy law. We've outlined critical components of federal pharmacy law that you will need to know to pass your MPJE exam. I was always the student in school that needed to highlight the most important information to remember and then I would memorize that information. Recalling information from a large textbook was always difficult for me. Rather than reading a textbook, we've supplied the information in easily digestible, bite-sized pieces. We've used bullet points to help you be able to quickly memorize important facts about each agency, regulation, law, etc. We've also created a super-helpful list of questions within the book to help you identify areas of pharmacy practice where state laws can often vary. This table is a list of questions that you can fill in as you read your respective states' laws and regulations. We've added this to ensure that you don't overlook the important differences in pharmacy laws across the United States. Whether you are a new graduate who needs to pass your law exam to begin your practice or a 20-year veteran who is moving to a new state, this review will absolutely help prepare you to pass your MPJE law exam and help you obtain your pharmacy license.

rxprep mpje pdf: Clinical Pharmacist's Guide to Biostatistics and Literature Evaluation Robert DiCenzo, 2011 Whether you are interpreting the medical literature to optimize patient care, improve health outcomes, or generate hypothesis for research, an understanding of biostatistics is essential for success. Despite exposure to biostatistics in undergraduate and professional education, pharmacists tend to be less confident in their knowledge of biostatistics and their ability to interpret the medical literature than in their clinical skills. This book was developed to bolster the pharmacist's knowledge and confidence for using biostatistical tools for interpreting the literature. With material drawn from ACCP's renowned Pharmacotherapy Self-Assessment Program (PSAP) and the live pharmacotherapy preparatory course Updates in Therapeutics, editor Robert DiCenzo, Pharm.D., FCCP, BCPS, has designed this review to support pharmacists' preparation for the Pharmacotherapy and Ambulatory Care Board of Pharmacy Specialties (BPS) examinations.

to study for the NAPLEX. Overwhelming doesn't begin to describe the feeling. Where do you start? How do you prioritize and review for this gigantic exam? When I am preparing to take pharmacy exams, I have a very difficult time learning and retaining information from massive review books. I find myself reading for 5-10 minutes and my mind begins to wander, retaining nothing of what I just read. After years of practice and test taking (NAPLEX, BCPS, CGP etc.), I have found that I learn most efficiently by memorizing information in short important bullet points. In this study guide, I have selected the most commonly used medication classes and have provided you with my most highly testable pearls on each class. In this book, I cover over 150 medication classes which includes nearly 400 medications! I have created bullet points which will help you review more efficiently and not waste your limited study time. This resource is not intended to be a package insert for every medication, but rather a way to try to prioritize your study process and understand the major nuggets of information that you must know to help you pass the NAPLEX. The intent is to give you a brief, incredibly helpful review of the most important medications you will likely be tested on the NAPLEX exam.
