History and Founding Principles of Sigma Kappa

The story of Sigma Kappa begins in 1874 when five women at Colby College in Maine established the sorority. These founding members sought to create a lasting sisterhood grounded in strong moral

values and academic excellence. The organization was built on the principles of loyalty, friendship, and service, which continue to guide its members today. Over the decades, Sigma Kappa expanded across the United States, maintaining a commitment to fostering personal growth and lifelong friendships among its members. The Founding Members and Their Vision

The five founders—Mary Caffrey Low Carver, Elizabeth Gorham Hoag, Ida Fuller Pierce, Frances Elliott Mann Hall, and Louise Helen Coburn—embodied the spirit of determination and camaraderie. Their vision was to establish a sorority that would support women academically and socially during an era when higher education for women was still gaining acceptance. sigma kappa secrets: Pledged Alexandra Robbins, 2011-05-24 Alexandra Robbins wanted to find out if the stereotypes about sorority girls were actually true, so she spent a year with a group of girls in a typical sorority. The sordid behavior of sorority girls exceeded her worst expectations -- drugs, psychological abuse, extreme promiscuity, racism, violence, and rampant eating disorders are just a few of the problems. But even more surprising was the fact that these abuses were inflicted and endured by intelligent, successful, and attractive women. Why is the desire to belong to a sorority so powerful that women are willing to engage in this type of behavior -- especially when the women involved are supposed to be considered 'sisters'? What definition of sisterhood do many women embrace? Pledged combines a sharp-eyed narrative with extensive reporting and the fly-on-the-wall voyeurism of reality shows to provide the answer.

sigma kappa secrets: Confronting Racism in Higher Education Jeffrey S. Brooks, Noelle Witherspoon-Arnold, 2013-03-01 Racism and ignorance churn on college campuses as surely as they do in society at large. Over the past fifteen years there have been many discussions regarding racism and higher education. Some of these focus on formal policies and dynamics such as Affirmative Action or The Dream Act, while many more discussions are happening in classrooms, dorm rooms and in campus communities. Of course, corollary to these conversations, some of which are generative and some of which are degenerative, is a deafening silence around how individuals and institutions can actually understand, engage and change issues related to racism in higher education. This lack of dialogue and action speaks volumes about individuals and organizations, and suggests a complicit acceptance, tolerance or even support for institutional and individual racism. There is much work to be done if we are to improve the situation around race and race relation in institutions of higher education. There is still much work to be done in unpacking and addressing the educational realities of those who are economically, socially, and politically underserved and oppressed by implicit and overt racism. These realities manifest in ways such as lack of access to and within higher education, in equitable outcomes and in a disparity of the quality of education as a student matriculates through the system. While there are occasional diversity and inclusion efforts

made in higher education, institutions still largely address them as quotas, and not as paradigmatic changes. This focus on “counting toward equity rather” than “creating a culture of equity” is basically a form of white privilege that allows administrators and policymakers to show incremental “progress” and avoid more substantive action toward real equity that changes the culture(s) of institutions with longstanding racial histories that marginalize some and privilege others. Issues in higher education are still raced from white perspectives and suffer from a view that race and racism occur in a vacuum. Some literature suggests that racism begins very early in the student experience and continues all the way to college (Berlak & Moyenda). This mis-education, mislabeling and mistreatment based on race often develops as early as five to ten years old and “follows” them to postgraduate education and beyond.

A fascinating, moving book: part history of the Foundling Hospital and the development of child psychology, part Cowan's own story, and part that of Cowan's mother' LUCY SCHOLES, TELEGRAPH Growing up in a wealthy enclave outside San Francisco, Justine Cowan's life seems idyllic. But her mother's unpredictable temper drives Justine from home the moment she is old enough to escape. It is only after her mother dies that she finds herself pulling at the threads of a story half-told - her mother's upbringing in London's Foundling Hospital. Haunted by this secret history, Justine travels across the sea and deep into the past to discover the girl her mother once was. Here, with the vividness of a true storyteller, she pieces together her mother's childhood alongside the history of the Foundling Hospital: from its idealistic beginnings in the eighteenth century, how it influenced some of England's greatest creative minds - from Handel to Dickens, its shocking approach to childcare and how it survived the Blitz only to close after the Second World War. This was the environment that shaped a young girl then known as Dorothy Soames, who was left behind by a mother forced by stigma and shame to give up her child; who withstood years of physical and emotional abuse, dreaming of escape as German bombers circled the skies, unaware all along that her own mother was fighting to get her back.
