traditions and encounters 4th edition: Pagans and Christians in the Late Roman Empire Marianne Sághy, Edward M. Schoolman, 2017-10-10 Do the terms 'pagan' and 'Christian,' 'transition from paganism to Christianity' still hold as explanatory devices to apply to the political, religious and cultural transformation experienced Empire-wide? Revisiting 'pagans' and 'Christians' in Late Antiquity has been a fertile site of scholarship in recent years: the paradigm shift in the interpretation of the relations between 'pagans' and 'Christians' replaced the old 'conflict model' with a subtler, complex approach and triggered the upsurge of new explanatory models such as multiculturalism, cohabitation, cooperation, identity, or group cohesion. This collection of essays, inscribes itself into the revisionist discussion of pagan-Christian relations over a broad territory and time-span, the Roman Empire from the fourth to the eighth century. A set of papers argues that if 'paganism' had never been fully extirpated or denied by the multiethnic educated elite that managed the Roman Empire, 'Christianity' came to be presented by the same elite as providing a way for a wider group of people to combine true philosophy and right religion. The speed with which this happened is just as remarkable as the long persistence of paganism after the sea-change of the fourth century that made Christianity the official religion of the State. For a long time afterwards, 'pagans' and 'Christians' lived 'in between' polytheistic and monotheist traditions and disputed Classical and non-Classical legacies.

traditions and encounters 4th edition: Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of

air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.
