women s conference topics pdf: Current Issues in Women's History Arina Angerman, Geerte Binnema, Annemieke Keunen, Vefie Poels, Jacqueline Zirkzee, 2013 This lively collection of essays, originally published in 1989, illustrated recent developments in the area, with chapters by contributors from many different countries and disciplines. Asking new questions and using sources in a challenging way, the contributors reflect 1980s debates about politics and academic research in women's studies. They cover a wide range of topics, dealing for example with opportunities and obstacles for women within male-defined power-structures and institutions such as science, religious communities, and ancient Roman industry. They discuss feminists and feminist movements, analyse the utterances of women and men in medieval literature and in defamation cases, and give insights into the ways femaleness and femininity are given meaning. The essays on theory deal with such important issues as women's historiography, and androcentrism and ethnocentrism in history.

women s conference topics pdf: Steps to Personal Revival Helmut HAUBEIL, 2020-03-17 On August 14, 2011, when I was in Kandergrund in the Bernese Highlands in Switzerland an important connection became very clear to me. I recognized a spiritual cause for why we are losing part of our youth. I was very shocked. I thought of my children and grandchildren. Since then I have been intensively occupied with this subject. Now I believe that the same spiritual cause is behind many of our problems; specifically the personal problems, in the local churches and the world-wide church. It is the lack of the Holy Spirit. If this is the cause, then we should urgently address this issue. If the cause can be eliminated or considerably reduced, then many problems will become superfluous or will be resolved.

women s conference topics pdf: Women and Human Development Martha C. Nussbaum, 2000-03-13 In this major book Martha Nussbaum, one of the most innovative and influential philosophical voices of our time, proposes a kind of feminism that is genuinely international, argues for an ethical underpinning to all thought about development planning and public policy, and dramatically moves beyond the abstractions of economists and philosophers to embed thought about justice in the concrete reality of the struggles of poor women. Nussbaum argues that international political and economic thought must be sensitive to gender difference as a problem of justice, and that feminist thought must begin to focus on the problems of women in the third world. Taking as her point of departure the predicament of poor women in India, she shows how philosophy should undergird basic constitutional principles that should be respected and implemented by all governments, and used as a comparative measure of quality of life across nations.

women s conference topics pdf: Seeking Solutions National Research Council, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on Advancing Institutional Transformation for Minority Women in Academia, 2013-12-17 Seeking Solutions: Maximizing American Talent by Advancing Women of Color in Academia is the summary of a 2013 conference convened by the Committee on Women in Science, Engineering and Medicine of the National Research Council to discuss the current status of women of color in academia and explore the challenges and successful initiatives for creating the institutional changes required to

increase representation of women of color at all levels of the academic workforce. While the number of women, including minority women, pursuing higher education in science, engineering and medicine has grown, the number of minority women faculty in all institutions of higher education has remained small and has grown less rapidly than the numbers of nonminority women or minority men. Seeking Solutions reviews the existing research on education and academic career patterns for minority women in science, engineering, and medicine to enhance understanding of the barriers and challenges to the full participation of all minority women in STEM disciplines and academic careers. Additionally, this report identifies reliable and credible data source and data gaps, as well as key aspects of exemplary policies and programs that are effective in enhancing minority women's participation in faculty ranks. Success in academia is predicated on many factors and is not solely a function of talent. Seeking Solutions elucidates those other factors and highlights ways that institutions and the individuals working there can take action to create institutional cultures hospitable to people of any gender, race, and ethnicity.
