because he lives sheet music pdf: Democracy and Education John Dewey, 1916 . Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word control in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

because he lives sheet music pdf: Studying Digital Media Audiences Craig Hight, Ramaswami Harindranath, 2017-01-27 Although many digital platforms continue to appropriate and reconfigure familiar forms of media experience, this is an environment which no longer consistently constructs an identifiable 'mass' audience in the terms understood by twentieth century audience researchers. The notion of 'audiencing' takes on different characteristics within a digital environment where platforms encourage users to upload, share and respond to content, while the platforms themselves monetise the digital traces of this activity. This environment demands new ways of thinking about audience and user engagement with media technologies, and raises significant questions on methods of conceiving and researching audience-users. This volume addresses ongoing debates in the field of audience research by exploring relevant conceptual and methodological issues concerning the systematic study of digital audiences. Drawing from work conducted by researchers based in Australia and New Zealand, the book uses theoretical frameworks and case study material which are of direct relevance to audience researchers globally.
