According to her, the reason why there is so little happiness in the world is dependency. Happiness is not dependent on 'anything' or 'anyone', or found 'anywhere'. We keep delaying our happiness until things are just right in our life. We think we will be happy in the future and then wonder why we are not happy now. Happiness is only possible when we are able to accept everyone as they are, at every moment, in every situation. This book is a medium for the awakening and acceptance of self-responsibility. Helping us choose our thoughts and feelings aligned with our true nature of purity, peace and love. To make us shift from asking to sharing; from holding on to letting go; from expectations to acceptance; from the past and the future to being in the now. bk luhar: Moral Values, Attitudes and Moods BK Jagdish Chander, 2021-04-23 OUR universe consists of two different aspects: the physical or material and the spiritual or metaphysical. Had man been only physical or material entity, he would not have felt concerned with the moral or spiritual values. In that case, he would have behaved like a machine. We find that almost all types of man's actions - whether they are political, social, economic, filial, conjugal, ritualistic - are adjudged by the society from the moral point of view also. The Watergate Scandal, which led to the exit of President Nixon from the White House and to the launching of prosecution against his top aides, is an historical illustration, the memory of which is still fresh in the minds of the people all over the world. It clearly shows that even if a person has reached the apex of political and executive machinery by means of an unprecedented popular vote and is strongly set in the highest echelons of power and is granted by conventions or the political constitution of his country, certain privileges, prerogatives and immunities, the society looks at his actions from the moral point of view also.

bk luhar: **Noise and Environment** Daniela Siano, Alice Elizabeth Gonzalez, 2021-02-03 Noise pollution is one of the factors that affect the quality of life of the general population, especially in urban areas, where the noise levels are often high due to the presence of numerous sources, such as transport infrastructures, activities production and commercial areas, entertainment venues and other sound sources which, although temporary, such as construction sites and outdoor music events, affect general noise levels. Even if noise is one of the oldest pollutants referred to in history, for years, the problem of noise pollution has been often considered less important than others related to the environment, such as air pollution, water pollution, and waste management. The regulations in force to contain the noise have become increasingly stringent as each individual is constantly exposed to noise and often the noise is treated just as a scourge of modern society. Making noise is becoming easier and cheaper each day, but just the opposite for controlling it. Deeper studies are needed to understand the core of current noise problems; new materials and techniques are needed to control them. This book is a combination of theory and practice based on the latest research. The studies in this book range from evaluation methods for the perception of noise and outline forecast criteria that can be integrated with applications for acoustic mapping as well as the use of innovative techniques and materials for its abatement. The main purpose of this book, organized in 8 chapters, is to provide an overview of the recent studies in this field and the applications in different research studies. The authors, contributing to the success of this book, provide a series of practical applications of their recent studies aimed at the reduction of noise in different environments. The editors would like to thank all the authors who, through their studies and research, have accepted our invitation to share recent discoveries in this field with the scientific community.

bk luhar: *Vivekacudamani, the Crest Jewel of Discernment* Sankara, 2012-07 What is Advaita Vedanta? What means or instruments does it utilize in its attempt to comprehend Reality? What is the nature of its aim? If we begin by answering these questions, we will be ready to follow with the right intelligence the message given by the great SANKARA in Vivekacudamani. The path which is outlined here is not for the majority, quite the contrary. It is for those who, having attained maturity, tend towards full Awakening. It is for those who want to bring about a profound revolution within themselves; and this requires an act of courage, of steadfastness and, at the same time, of great humility. Advaita Vedanta is for those who, tired of a long pilgrimage, have finally stopped and in the silence of their own hearts have decided to launch a powerful attack on that terrible and treacherous enemy who lives not outside of us but right within us, and thus realize full liberation from all psycho-physical conflict and bondage. As darkness and its effects vanish when the sun rises, so, when realization of non-dual beatitude dawns, do bondage and suffering vanish without a trace (Vivekacudamani, sutra 319) SANKARA has been one of the greatest philosophers of India. He dedicated his brief and intense life (788-820) to re-establish the authority of the ruti, to codify the Advaita Vedanta, the doctrine of Non-duality, and to anchor the Metaphysical Tradition of the Veda through the foundation of monasteries (maṭha) and monastic orders. With his bhasya (commentary) to the Upanisad, the Brahmasutra, and the Bhagavadgita, and with his own writings, Sankara has profoundly influenced not only India's philosophical development, but that of the entire world. RAPHAEL is author and Master in the Western Metaphysical Tradition as well as the Vedanta. For over 35 years, he has written a series of books on the pathway of Non-duality (Advaita). He has translated directly from the original Sanskrit and Edited a number of key Vedanta texts. His entire work is a conscious reunification of both Western and Eastern Traditions into Unity of Tradition.

bk luhar: Creative Power of Silence Swami Paramananda, 2018-12-01 Silence, the great unseen power, the miracle of life, works upon our character with strange contrast. Prior to spiritual studies, the idea of complete silence is strongly advocated by many. In practicing the silence, it is found to unfold our higher nature. The silence allows concentration. With the intrusion of noise, the mind cannot be receptive. Contrary to some belief, the silence is not to free the mind to allow emptiness. It means co-ordination of body and mind. It reduces friction and becomes a definite factor for our concentrated thought. The silence is essential for all forms of study. "A silent being is a very restful being. All wise people realize the deeper part of our nature can only be expressed effectively when our outer being is still."

bk luhar: The Vedas and Upanishads for Children Roopa Pai, 2023-05-25 Three thousand years ago, deep inside the forests of India, a great 'thought revolution' was brewing. In those forest labs, the brightest thinker-philosophers contemplated the universe, reflected on ancient texts called the Vedas and came up with startling insights into questions we still don't have final answers to, like:

- What is the universe made of?
- How do I know I'm looking at a tree when I see one?
- Who am I?

And where did they put those explosive findings? In a sprawling body of goosebumpy and fascinating oral literature called the Upanishads! Intimidated? Don't be! bk luhar: Vedic Cosmography and Astronomy Richard L. Thompson, 2004 The mysteries of the fifth Canto of the Srimad Bhagavatam have long puzzled students of Vedic cosmography and astronomy. Confronted with a description of the universe that seems much at variance with the information provided by our senses and standard astronomical calculations, foreign observers and even Indian commentators from the middle ages up to the present have concluded that the Bhagavatam's account elaborated in other Puranas must be mythological. On the other hand the same persons have been much impressed with vedic astronomical treatises the jyotissastras which provide remarkably accurate measurements of the solar system.

bk luhar: *Human Development Report 2000* United Nations Development Programme, 2000 The eleventh edition in the series, the Human Development Report 2000: Human Development and Human Rights provides a thought provoking analysis of these two interrelated and intertwined issues. Human rights and human development are mutually reinforcing and culminate in enlarged human freedom. The Report traces the history of struggle for human rights as a common human experience and outlines the new frontier of the rights agenda for the 21st Century. HDR 2000 demonstrates the ways in which human rights enrich human development goals: adding moral force and ideas of claims, duties and obligations. Human development, in turn, brings a dynamic long-term perspective to human rights and adds more concrete analysis, quantification, and must consider the human rights impacts of policy choices. The Report analyses how human rights must be respected, protected and promoted in the development process. To that end, it addresses the accountability of governments to fulfill their duties, and provides a timely analysis of the duties and obligations of newer actors in the fields of human rights and human development such as corporations, NGOs, individuals, the international community and markets. Of particular importance is consideration of how the current global economic rules and institutions address human rights issues. The Report proposes strategies for promoting development that also protect and further human rights, with significant implications for a pro-human rights approach to development. HDR 2000 includes and updates the widely respected Human Development Indicators that compare the relative levels of human development in most countries of the world, and presents data tables on all aspects of human development.

bk luhar: *Motivational Verses from Sanskrit Texts* Aravinda Rao, 2019-01-24 Here we have a collection of a little over hundred verses, most of which were a part of the common man's knowledge not long ago. These are from the Mahabharata, the Pancatantra, the Hitopadesa, the Subhashita-s of Bhartrihari and such other texts. Some verses teach ethical behavior and some others realistically and bluntly tell about human behavior in different situations. Most of the present day societies are focusing more on imparting job-oriented skills to children, paying little attention to their emotional growth. The governments too are cutting back on the liberal arts which are essential for the emotional intelligence and maturity of our children. Such trends have negative manifestations which are sadly realized at a later stage in life. We realize that progress cannot be at the cost of human values and goals in life. These verses are like the 'box of truisms' and 'words to live by', in Louis Mac Neice's words. They may not be fully understood by the kids straightaway, but they reveal their full flavor as the kids grow and face the realities and problems of life. They are like the time release capsules which release themselves slowly.
